Ask your GP about taking part in a research study to help evaluate
the best rapid tests for COVID-19 infection.

- * You and your household may be eligible to take part, including any children *
- * If you take part you will have the standard nose/mouth swab test for COVID-19 and receive the result *
- * You may be offered other tests such as swabs or blood tests at the same time *

FOR FURTHER INFORMATION PLEASE CONTACT THE RESEARCH TEAM DIRECTLY

This practice is one of over 1000 practices in England contributing to pseudonymised data for national research and surveillance. These data enable continuous monitoring of new and known infections and diseases and is used in ethically approved research. The pseudonymised data is processed within the private and secure network of the Nuffield Department of Primary Health Care Sciences at University of Oxford under a formal data sharing agreement. The pseudonymised data may be linked with other NHS data for analysis including hospital episode statistics. Providing pseudonymised data does not affect patients, their care or privacy however if you no longer wish your data to be used please speak to your GP.
